Cloud Hosting - Microsoft Azure	✓	✓
Remote IP Access	✓	✓
High Availability	✓	✓
Secure Provisioning		✓
Automation Gateway		✓

AUTOMATION EDITION FEATURES

Secure Provisioning

Remotely provision new network devices via a connected Opengear console server. Allowing you to not only bootstrap an entire network, but also do in-line replacement of failed equipment, all without an on-site engineer.

Automation Gateway

Provides users and automation code the ability to discover and manage IP-based management interfaces via the Opengear management system, with the same level of simplicity and efficiency as if they were serial consoles. Delivering client free access from your web browser to your remote device management interfaces.
