

山东伟创石油技术有限公司
Shandong Weichuang Petroleum Technique Co., Ltd.

四川伟创石油装备制造有限公司
Sichuan Weichuang Petroleum Equipment Manufacturing Co.,Ltd.

公司简介 COMPANY PROFILE

山东伟创石油技术有限公司(全资子公司四川伟创石油装备制造有限公司)是集科研攻关、新技术推广应用,石油设备、工具、仪器设计、制造、修理、租赁和石油工程技术服务于一体的高新技术企业。并已通过ISO9001:2015国际质量体系认证和美国石油学会的API认证。公司已聚集了一批高素质的管理和科技人才,具有多项高科技含量的发明专利和实用新型专利,具备了较强的研发、制造和市场竞争能力。

我公司在引进消化吸收国外先进技术的同时结合国内油气勘探开发技术的特点与实际,研制开发的变径稳定器及系统(发明专利)、钻井随钻安全装置(发明专利)、无限开关旁通阀及系统(发明专利)、水力震荡防托压器(发明专利)、井下扩眼器(发明专利)、水力加压器(专利)、震击器系列(专利)、泥浆防溅阀(专利)、高性能内防喷工具(专利)、钻通刮一体工具(专利)等项石油工具专利技术和专有技术,经中石化各石油工程公司、中石油各石油钻探公司和中东各国现场使用证明,产品技术先进、质量稳定、服务优质,得到了用户一直好评。为提高石油工程的机械钻速、井身质量、井下安全和经济效益都起到了重要作用。

公司以“技术创新为基础,以产品和服务质量为根本,以诚信经营和客户满意为宗旨,以共同推进石油工程技术进步为己任。”公司内强素质外抓服务,推行了全面质量管理,以全员的工作质量保证产品质量。

公司承诺把每一件石油工具都做成精品,确保产品出厂合格率达百分之百;把服务做到现场,急用户所急、想用户所想。愿为中国油气田勘探开发技术的进步做出更大贡献。

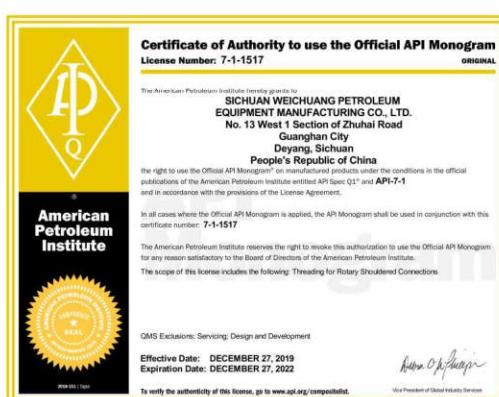

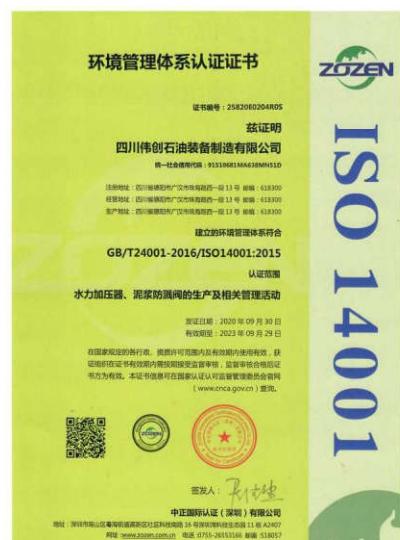

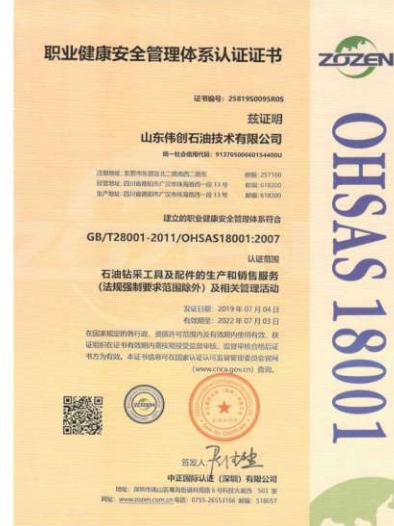

Shandong Weichuang Petroleum Technology Co., Ltd. (a wholly-owned subsidiary of Sichuan Weichuang Petroleum Equipment Manufacturing Co., Ltd.) is a collection of scientific research, new technology promotion and application, petroleum equipment, tools, instrument design, manufacturing, repair, leasing and petroleum engineering technology services An integrated high-tech enterprise. And has passed ISO9001:2015 international quality system certification and API certification of American Petroleum Institute. The company has gathered a group of high-quality management and scientific and technological talents, has a number of high-tech invention patents and utility model patents, and has strong R&D, manufacturing and market competitiveness

Together with the University of Petroleum and relevant scientific research departments, our company has developed dozens of patented and proprietary technologies for petroleum tools, approved by various petroleum engineering companies of Sinopec, petroleum drilling companies of CNPC and many countries in the Middle East that the products have advanced technology, stable quality and high-quality services, and have been praised by users. It has played an important role in improving the drilling speed, well quality, downhole safety and economic benefits of petroleum engineering.

The company takes "technological innovation as the foundation, product and service quality as the foundation, integrity management and customer satisfaction as the tenet, and joint promotion of petroleum engineering technology progress as its own responsibility." The company strengthens the quality of service and implements total quality management. Ensure product quality with the quality of the work of all staff.

The company promises to make every piece of petroleum tools into high-quality products, to ensure that the product pass rate is 100%; to provide services to the scene, anxious for users, and think about what users think. Willing to make greater contributions to the advancement of China's oil and gas field exploration and development technology.

水力加压器 (专利号:ZL 2008 2 0173683.0)

Hydraulic Thruster

SJ型水力加压器是一种应用于石油钻井、修井作业中的能量转换装置,它改变了钻井作业中靠下部钻铤的重量施加钻压的传统作业方式。它在不消耗额外能量、不需要其它特殊设备的情况下,利用循环钻井液的钻头水眼节流压降,作用在活塞上下端面造成推力的差值给钻头加压。解决了特殊钻井作业不能靠下部钻铤的重量施加稳定钻压的技术难题。

The SJ Hydraulic Thruster is an energy conversion device used in oil drilling and workover operations. It changes the traditional way of WOB by the weight of the lower drill collar. Without consuming or requiring additional energy and other special equipment, it can give a stable WOB by the fuction of the pressure drop on bit that actting on the upper and lower faces of the SJ tool pistons. It solves the technical problem that the weight of the lower drill collar cannot be applied to stabilize the WOB for special drilling operations.

特点 Features & advantages

1、把钻铤刚性加压改为柔性加压,改善了钻杆的受力状态,降低了中和点高度,减小了钻杆弯曲和钻头倾角,提高了钻具的稳定性和导向性

Enhanced stability and directionality by shifting stressed states on drill pipes.

2、减震效果实现了“质”的飞跃

Improved shock absorbing performance.

3、它改变了钻压的施加位置,水力加压器通过水力效果直接给钻头加压,作用力不必经较长钻铤传递,实现了防斜打直、定向准确的目的

Better deviation control with hydraulic pressure directly to WOB.

4、多种钻具组合方式,适用范围广

Various BHA combination and wide application scenarios.

5、与常规钻井相同的操作方式,使用方便

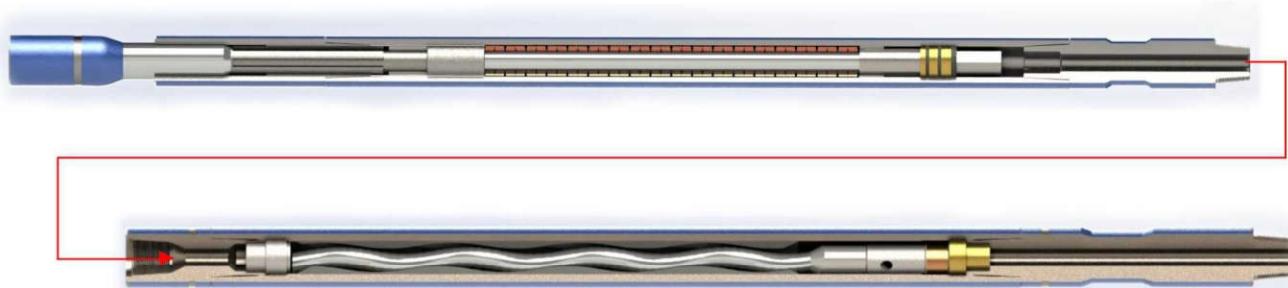

Simplify operation with conventional deployment

水力振荡器 (专利号:ZL201520416341.7)

Hydraulic Oscillator

水力振荡器通过激发泥浆压力的脉冲波动,使自身产生纵向振动来提高钻进过程中钻压传递的有效性和减少BHA与井眼之间的摩阻,它可以应用于几乎所有的钻井设计中,特别是在有动力钻具的定向段改善钻压的传递,减少扭转振动效果尤为明显

The Hydraulic Oscillator can stimulate the pulse fluctuation of the mud pressure and make itself generate longitudinal vibration to improve the effectiveness of the WOB transmission during the drilling process and reduce the frictional resistance between the BHA and the borehole. It can be used in almost all drilling designs, especially in the directional section with power drilling tools.

特点 Features & advantages

1、改善井下钻压传递效果 Deliver weight directly on bit while horizontal drilling

依靠振动来改善钻压传递效果,定向滑动钻进时效果明显,降低粘卡趋势,降低了憋停马达等情况,减少了由于反扭矩而发生工具面失控的情况。

Perfect tool to speed up directional sliding drilling and reduce stuck occasion

2、明显降低摩阻 Lower friction dramatically

轻微振动BHA,将静摩擦转变为动摩擦,明显降低摩阻,改善钻压传递,避免出现脱压现象。

Continuous and mild vibration generated by Oscilator that shakes drill string to avoid statical friction and weight loss on bit situation

3、有效提高机械钻速 Increased ROP

通过改善钻压传递效率,避免粘卡、脱压,从而显著提高机械钻速,增加日进尺量。

Improved bit weight delivery to lessen tool stuck, thus increase ROP and daily drilling footage.

4、与MWD/LWD兼容 Compatible with MWD/LWD

水力振荡器产生的轴向振动是温和的,不会损坏MWD/LWD工具或干扰信号传递,安装于MWD/LWD上部或下部皆可。

The viberation generated by Hydraulic Oscilator is slight and mild, which will not affect MWD/LWD sgnal transmission or damage the device.

5、与各种钻头均配合良好 Optimal companion of drill bit

可同牙轮钻头和PDC钻头配合使用,对钻头牙齿或轴承无冲击损坏,同时,良好的钻压传递效果,更杜绝了顿钻冲击,使钻头受力均匀,能一定程度地保护钻头,延长钻头的使用寿命。

Excellent compatiliiy with roller bit and PDC bit accelarate WOB transmit and effect, hence eliminates drilling impact and extend bit lifetime.

机械式减震器 Mechanical Shock Tool

HJ型机械式减震器，以碟形弹簧作为弹性元件来吸收钻具的跳动和震动，工作特性不受工作环境的影响，克服了常规液压减震器对密封性能的依赖，具有结构简单、工作可靠、操作维修方便、减震效果好、工作寿命长等优点。

The HJ type Mechanical Shock Tool uses a disc spring as an elastic element to absorb the beating and vibration of the drilling tool. The working characteristics are not affected by the working environment. It overcomes the dependence on the sealing performance, such as the conventional Hydraulic Shock Tools. It has a simple structure, Reliable work, convenient operation and maintenance, good effect, long working life and so on

特点 Features & advantages

1、轴向拉、压均有弹性

Bit bounce and vertical shock absorption

2、全机械式结构，减震效果不受温度影响

Mechanical structure, less affected from downhole temperature.

3、平衡活塞设计，内腔无高压，密封更可靠

Balanced piston design delivers reliable seal performance and normal bore pressure.

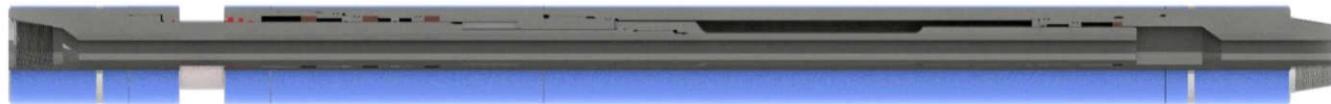

4、刚度可调，适应不同地层的需要

Adjustable shock absorption level to adapt different earth layer

液压减震器 Hydraulic Shock Tool

YJ型液压减震器,以硅油作为弹性元件来吸收钻具的跳动和震动,安装在靠近钻头的位置,对延长钻头使用寿命、保护钻具和地面设备具有良好的效果。

The YJ type Hydraulic Shock Tool uses silicone oil as an elastic element to absorb the jump and vibration of the drilling tool. It is installed near the drill bit and has a good effect on prolonging the service life of the bit and protecting the drilling tool and ground equipment.

特点 Features & advantages

1、弹性柔和,减震和钻头保护效果明显

Optimal mitigation to bit bounce, shock and vibration

2、进口密封材料,耐高温,耐高压

Robust seal performance even in Hi-Temp and Hi-Pressure environment

3、纯液压结构,减少内部刚性接触,耐用性更好

Durable hydraulic design to reduce internal abrasion

双向减震器 Tow-Way Shock Tool

SJ型双向减震器是一种液压式减震器，同时具有纵向和周向的减震效果，它能保持正常的钻压和扭矩，减少钻头、钻具及地面设备的振动破坏。

The SJ type Two-Way Shock Tool is a hydraulic shock absorber that has both longitudinal and circumferential shock absorption effects. It can maintain the right WOB and torque, and reduce vibration damage on bit, drilling tools and ground equipments.

特点 Features & advantages

1、纵向弹性，减少钻头跳动损伤

Optimal mitigation to bit bounce, shock and vibration

2、周向弹性，保持恒扭钻进

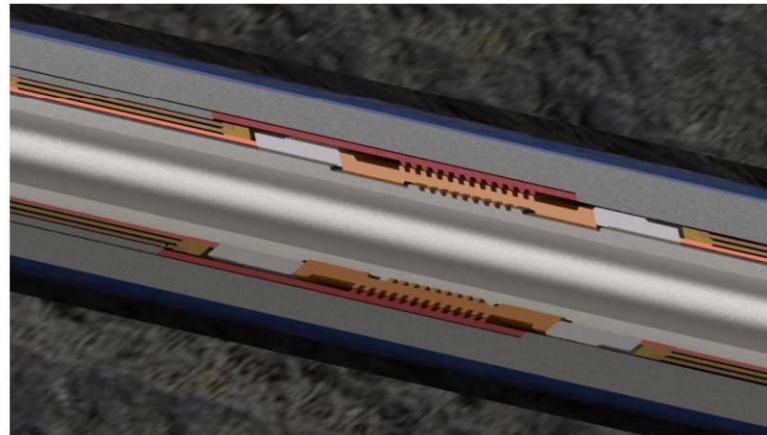

Circular shock absorption maintains steady torque while drilling

机械式随钻震击器 (专利号:ZL 2014 2 0859406.0)

Mechanical Drill Jar

QJ型机械式随钻钻震击器是一种全机械式的随钻震击工具,它集上、下击作用于一体,正常钻进时充当钻柱使用,钻具遇卡时能及时震击解卡。

The QJ type Mechanical Drill Jar can be actuated by mechanical fully, and operated in two way, upwards and downwards. It will be used as a drill string when drilling naturally, and can jarring promptly when the drill string was stucking.

特点 Features & advantages

1、上、下击震击力可调,且调节准确、范围广

Adjustable and accurate impact power separately.

2、全机械式结构,震击效果不受油质变化的影响

Mechanical structure guarantees impact performance

3、平衡活塞设计,内腔无高压,密封更可靠

Piston balance design releases inside pressure

4、自带挠性接头,有效降低震击器自身的弯曲应力

Come with flexible joint to reduce self bending stress

全液压随钻震击器

Hydraulic Drilling Jar

QY型全液压随钻震击器是一种随钻震击工具,它上、下击均为液压式,震击延时时间范围:30s~240s,并能实现震击力无级调节。

The QY type Hydraulic Drill Jar is a kind of two-way Hydraulic jar that can be operated both upwards and downwards. The jarring delay time is 30s ~ 240s, and the act force can be adjusted according to the lifting force on the ground.

特点 Features & advantages

1、上、下震击力地面可控

Upward and downward jarring force can be controlled on ground.

2、液压式结构,冲击力更强

Hydraulic structure, stronger impact

3、正常钻进时内腔处于卸压状态,不影响震击执行机构寿命

The inner cavity is in the pressure relief state during normal drilling, which does not affect the service life of the jarring actuator

4、结构简单,有效避免机械卡滞

Simple structure, avoid mechanical sticking effectively

地面震击器

Surface Bumper Jar

DJ型地面震击器是用于钻井平台上的下击器，震击释放瞬间利用钻柱重量锤击卡点，同时也能实时调节震击吨位，性能可靠，使用方便。

The DJ type Surface Bumper Jar can be used only on drill platform, hammering the sticking point with the weight of drill string. The bumper force can be adjusted on drill stand for reliable property and usableness.

特点 Features & advantages

1、震击力连接可调

The bumper force can be adjusted continuously

2、长行程，下击可靠

Long working stroke, downwards jarring reliable

3、另有优化后的卡瓦结构，能明显提高震击寿命

Another optimized slip is designed, which can obviously improve the working life

开式下击器

Fishing Bumper Jar

KXJ型开式下击器是利用钻柱重量产生下击的震击解卡工具,它工作行程长,下击力大,结构简单,便于维修和使用。

The KXJ type Fishing Bumper Jar can operate downwards by use of the weight of drill string on the top of itself. It has a long working stroke, big bumping force, simple structure, and easy operation and maintenance.

特点 Features & advantages

1、结构简单,几乎零故障率

Simple structure, almost zero failure rate

2、依靠上部钻柱重量产生下击,震击力地面可控

Operate by the weight of the drill string above, the jarring force can be controlled on the ground

3、切割作业中,可作为“恒压给进”工具使用

It can be used as a "constant WOB" tool in cutting operation

超级震击器 Super Fishing Jar

CSJ型超级震击器是一种液压式的上击器，能实现震击力的无级调节，与液压加速器配合使用时，震击效果更明显。

The CSJ type Super Fishing Jar is a hydraulic jar upwards, and the operate force can be adjust continuously. The effect will be better when working with a Jar Intensifier.

特点 Features & advantages

1、震击力大,打捞解卡效果明显

Great jarring force, free stick effectively

2、纯机械式限流阀设计,震击延时不受液压油温度影响

Jarring delay time is not affected by temperature with a special mechanical release valve

3、与加速器配合使用,提升震击能力,有效缩短解卡时间

Working with a Jar Intensifier will get a greater jarring force and shorten the free stick hours

技术参数 Specifications

液压加速器

Hydraulic Jar Intensifier

YJQ型液压加速器与CSJ型超级震击器配套使用,增强震击效果,建议连接在超级震击器上方1~3根钻铤范围内。

The YJQ type Hydraulic Jar Intensifier can be used with CSJ type Super Fishing Jar to stronger the jar action. It is recommended to connect the YJQ within 1~3 drill collars above the Super Jar.

特点 Features & advantages

1、充当“液力弹簧”，显著提高钻柱的拉伸弹性

Acting as a "hydraulic spring" that can improve the tensile elasticity of drill string significantly

2、消除了井壁摩阻对上击器震击力的削弱作用,提高震击效果

It can improve the jarring performance by eliminating the weakening effect of wellbore friction

3、可以减弱打捞震击过程对地面设备的有害冲击

Reduce the harmful impact on ground equipment during jarring process

遥控变径稳定器 (发明专利号:ZL201210583186.9)

Remote Guage Stabilizer

遥控变径稳定器在钻进过程中，通过地面遥控调整稳定器的尺寸大小，改变下部钻具的井斜控制能力，从而较准确地控制井眼的井斜角。

The RGS tool can accurately control the inclination angle of the wellbore by adjust the size of itself remotely on the ground during the drilling process.

特点 Features & advantages

1、一体式结构，强度高

Integral structure ensures high intensity of tool

2、小径起下钻，保证起下钻过程安全

Configurable tool diameter increases trip safety

3、引入电子检测系统，工作状态一目了然

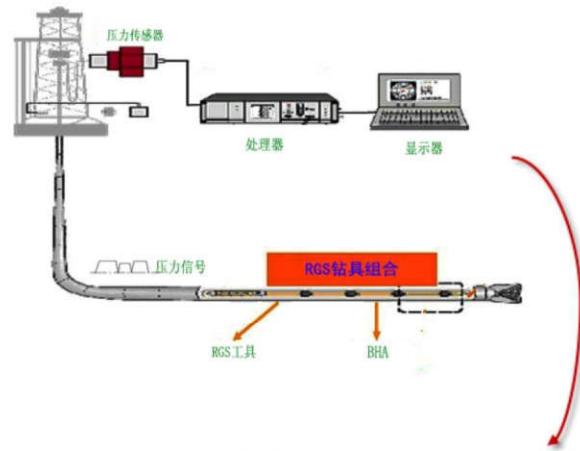

Visual display of downhole gauge status

4、扶正面激光融敷技术，高耐磨耐冲击

Laser melt hardbanding surface of stabilizer implement high abrasion resistance.

5、双位置控制的凸轮专利技术，能通过开停泵控制工具在井下的大小径工作状态

Adjusting tool diameter by open or stop the pump.

可调式变径稳定器

Adjustable Guage Stabilizer

该稳定器是一种新型的钻井用的可变径稳定器,它是利用钻井液压力将扶正块推出,达到变径的目的,停泵时,扶正块会自动缩回,防止起下钻时发生遇阻或遇卡风险的发生。

The AGS tool is a new type of variable diameter stabilizer. It uses the pressure of drilling fluid to push out the centralizer to achieve the enlarged diameter. When the pump stopped, the righting block will automatically retract to prevent the risk of jade feet or jamming during tripping.

特点 Features & advantages

1、纯机械式结构, 稳定、可靠

Mechanical design certifies stabilizer performance

2、小径起下钻, 保证起下钻过程安全

Configurable tool diameter increases trip safety

4、入井使用前, 根据需要调节扶正块直径, 适应各种现场需求

Configuring tool diameter to match site needs

5、扶正面激光融敷技术, 高耐磨耐冲击

Laser melt hardbanding surface of stabilizer implement high abrasion resistance

6、长度短, 不影响立柱

Small size design to fit any string length

无限次开关旁通阀 (发明专利号:ZL 2013 1 0476726.8)

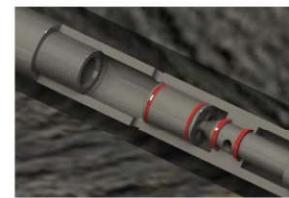

PTL Tool

1、停泵(旁通关)
Pump stopped(bypass off)

2、开泵(旁通关)
Pump started(bypass off)

3、开泵(旁通开)
Pump started(bypass on)

无限次开关旁通阀是一种通过钻井压差进行开关的钻井阀，它不需要投球或憋压，通过地面控制泥浆泵的开停来切换井下工具的旁通通道打开或关闭，通常被安装在底部钻具组合的上部，在实施一些重要作业时，它可以提供旁通循环通道来实施这些作业。

The PTL tool is a drilling valve that can be opened and closed infinitely by the drilling pressure drop. It does not need to throw or hold the pressure. The bypass channel of the PTL tool can be switched on or off by controlling the start or stop of mud pump on ground. It is usually installed on the top of the BHA. It can provide bypass circulation during some important operations.

特点 Features & advantages

1、双位置控制的凸轮专利技术，能通过开停泵切换旁通打开与关闭
Patent technology enforces pump to control valve open and close

2、不必投球，适应多种钻具组合
No ball drop required

3、起下钻通过旁通侧吸，提高效率
Bypass circulation shorten tripping time

4、电子检测系统，方便判断井下工具的真实状态
Real time display of valve status

套管防磨接头

Casing Anti-wear Joint

非金属防磨套, 带流道
 high-molecular-polymer wear
 housing with flow channels

金属防磨套, 不带流道
 metal wear housing
 without flow channels

套管防磨接头是针对石油钻井施工中防止起下钻及旋转钻具过程对套管的磨损、损害而开发的专用井下工具。该系列的防磨接头具有表面摩擦系数低, 耐磨损、强度高的特点, 适用于井下条件恶劣的特殊情况。

Casing Anti-wear Joint is a special downhole tool developed for preventing the casing abrasion and damage during the tripping and rotating on drilling. This series of anti-wear joints have the characteristics of low surface friction coefficient, wear resistance, and high strength, and are suitable for special conditions under severe underground conditions.

岩屑床清理器 Cuttings Bed Cleaner

岩屑床清理器(又名清砂器)主要用于破坏大斜度井眼中岩屑床的形成,利于岩屑随泥浆上返,达到“清砂”的目的。

The cuttings bed cleaner (also known as the sand cleaner) is mainly used to destroy the formation of the cuttings bed in high-inclination wellbore, which is conducive to the return of the cuttings with the mud to achieve the purpose of "sand cleaning".

特点 Features & advantages

1、一体式结构,无活动部件,强度高;

Integral Design

2、特殊设计的“V”形流道,机械旋转,水力返屑,双作用搅动、破坏、并清除岩屑床;

Cleaner incorporates "V" shape flow channel to implement mechanical rotation and hydraulic debris return simultaneously, hence stir, destroy and eliminate rock debirs.

3、“V”形工作翼表面镶嵌合金硬饰层,高耐磨,不缩径,同时可碾碎大岩屑,便于岩屑上返;

Alloy hardening surface of flow channel surface relieve upward resistance and enhance through rate

4、长度短,不会影响立柱摆放和二层台操作;

Small size design to ease string set and handle

5、纯机械结构,使用效果不受井温影响;

Mechanical design reduces well temperature affect.

6、使用时直接接入需求井段即可,使用简单。

Direct deployment on needs, no well section required.

随钻微扩眼器

Reamed-Dimension Stabilizer

随钻微扩眼器设计有上、下两个偏心刀翼，主要作用是降低井眼的狗腿严重度，清除井下的微狗腿、小台阶，修复井壁。

The RDS Tool is designed with two eccentric blades, an upper and a lower. The main function is to reduce the severity of doglegs in the wellbore, remove the micro-doglegs and small steps in the well, and repair the wellbore.

特点 Features & advantages

1、偏心设计，可扩出比工具通过直径更大的井眼尺寸；

Eccentric blades design enables wider than tool diameter hole reaming

2、上、下两组刀翼，实现正划眼和倒划眼；

Top and bottom blades empowers reamer to rotate clockwise or anticlockwise

3、随钻使用，有效减少划眼时间与通井次数；

Reaming while drilling function achieved

钻通刮一体工具 Drill-Drift Scraper

钻通刮一体工具主要用于清除井下套管内壁上残存的水泥，泥块和轧制中产生的毛刺、鳞片、管内防砂射孔时嵌在管壁上的子弹以及生产井套管壁上的铁锈、水垢、硬石蜡等所有正常施工作业的杂物。

The Drill-Drift Scraper was designed to fit all the drill, drift and casing scrape situation. It clears away the cement, scrap iron, artillery shells, burrs, paraffins, greasy dirt and other debris in the casing pipe.

特点 Features & advantages

1、刮刀表面硬化处理,耐磨
Hardening treatment on scraper blade

2、本体与刮刀筒体可相对转动,适应钻、通、刮使用要求
Various utilization method to suit drilling, drifting and scraping conditions by application of relative rotation between scraper body and sleeve

3、周向错位的三组刮刀串联,覆盖整个管壁范围
Fully covered by circumferential blade on scraper body

随钻安全装置 (发明专利号:ZL 2014 1 0168343.9)

Safety Sub

钻具随钻安全装置，是一种钻具应急安全脱扣工具。当井内发生卡钻需要脱扣时，可以很容易地从它本体联接螺纹处倒开，起出公接头以上钻具或仪器。其本体采用特殊宽锯形螺纹联接，设计有巧妙的拉紧结构，如右图，联接时只需施加一定的扭矩即构成一刚体，当井下钻具遇卡需应急脱扣时，从地面上给予大于联接扭矩40%以上，且方向相反的扭矩，即可轻松脱扣。

The HSU type drilling Safety Sub is a kind of emergency safety withdrawal tool. When a jam occurs in the well and needs to be tripped, it can be easily reversed from the connection thread of its body, and the drilling tool or instrument above the male joint can be pulled out.

拉紧凸齿重合状态

拉紧凸齿被拉紧

特点 Features & advantages

1、与钻柱连接下井使用时，两端接头螺纹紧扣扭矩应和钻柱的紧扣扭矩一致。

Clean and lubricate threads and faces and only apply make-up torque same as other tool of string.

2、倒扣时，应施加10~20kN的压力，决不能在受拉力的状态下倒扣，这样会损坏螺纹，也不易倒扣。

When back-off the sub, make sure 10~20kN forces applied and no tension on drill string which will damage threads of tool

3、倒扣时，应停泵后稍活动钻具，决不能在开泵的状态下倒扣，这样防退扣机构紧死，无法倒扣。

Stop pump and move string slightly to ease process.

钻具扩眼器 (专利号:ZL201520321559.4)

KYQ Joint

KYQ型是一种柱塞式的微扩眼工具,可用于断铣和导斜开窗侧钻工艺中,也可用于井眼缩径、井壁修复等井眼保径作业中,以提高井眼质量

KYQ Joint is a kind of plunger type micro reaming tool, which can be used in cutting milling and deflecting window sidetracking process, as well as in undergauged interval, so as to improve the quality of the wellbore.

特点 Features & advantages

1、整体式结构,维护简单,安全可靠性高

Integral structure brings robust and durable on harsh well condition

2、停泵后,刀体回缩,不影响起下钻

Automatically draw blades back when circulation stop

3、进口复合片切屑齿,寿命更长

Improved durability with high strength compound cutting teeth

扭力冲击器

Rotational Impactor

扭力冲击器可以将泥浆的流体能量转换成周向的、高频的、均匀稳定的机械冲击，并直接作用在PDC钻头上，使钻头能在旋转切削钻进的同时，辅助以冲击破碎岩层，以保证井身质量和提高机械钻速。

The Rotational Impactor can convert the fluid energy of the drilling mud into high frequency circumferential mechanical shock evenly and stably, and act directly on PDC, so that the bit can break the rock while rotary cutting drilling, which ensure the well bore quality and improve the ROP.

特点 Features & advantages

1、消除粘滑现象，减少反冲扭力

Eliminate stick slip and reduce recoil torque

2、提供额外的高频的周向冲击，提高PDC破岩能力

Provide additional high frequency circumferential impact to improve PDC drilling capacity

3、内部结构通畅，保证泥浆流动能量不会流失

No loss of mud energy because of the unobstructed bore

4、纯机械构造，无橡胶元件，无电子元件

Full mechanical structure, no rubber, no electronic component

泥浆防溅阀 (专利号:ZL201320870824.5)
Mud No-splash Valve

方钻杆型:

顶驱型:

加入滤网:

泥浆防溅阀是石油、天然气及地质勘探钻井工程中，在接单根卸开方钻杆之后防止钻井液从方钻杆水眼内流到钻台上的一种工具。

Mud No-splash Valve is a kind of tool to prevent drilling fluid from flowing from the Kelly to the drill platform when make a connection.

技术参数 Specifications

1、规格型号 Model: FJF165-NC50, FJF168-NC50, FJF178-520×521

(扣型可根据用户需要订做, 需在订单中说明)

2、开启压力: ≤2.0MPa 反向开启压力: ≤0.9MPa

3、运行压力降: ≤0.7MPa、剪切销钉压力: 15-16 MPa

4、工作环境温度: -40°C~80°C

5、循环介质温度: 0°C-100°C

6、抗拉强度: ≥965 MPa

7、最大抗拉能力: 250T

8、阀体最大承压: 35 Mpa

旋塞阀 (专利号:ZL 2017 2 0854990.4)

Kelly & Top Drive Plug

旋塞阀是防止井喷的有效工具之一,属于内防喷工具范畴,包括有方钻杆上、下旋塞和顶驱手动、液动旋塞。

Plug is manual control valve in the drill string circulation system, and one of the effective tools to prevent blowout. It includes upper & lower Kelly plugs and top drive upper & lower plugs.

特点 Features & advantages

1. 采用硬质合金喷涂和表面涂层工艺,质量可靠、寿命长

The valve achieves a reliable quantity and long service life by using professional surface treatment, like carbide spraying, PVD.

顶驱液动阀
Top Drive Plug

2. 专利技术,材料、结构优化设计,实现带压开启

Patented Technology: material and structure be redesigned optimized, and lower switch torque

3. 设计有与防溅阀配合使用的专用结构,实现顶驱防溅系统

A special structure is designed to cooperate with the Mud No-splash Valve to realize the top-drive anti-splash system

箭形止回阀

Arrow Back-pressure Valve

箭形止回阀具有防止高压油气从钻具内喷出的功能，是一种重要的钻柱内防喷工具。

Arrow Back-pressure Valve is a sort of pipe inside blowout preventer. It adopts arrow valve structure. It's directly connected to drill stem, and can prevent high-pressure oil stream from blowing out from drilling tool.

特点 Features & advantages

1、密封表面喷焊合金层，高耐冲刷；

Alloy layer bearing surface for long term capability

2、阀芯尺寸标准化，便于维护、更换

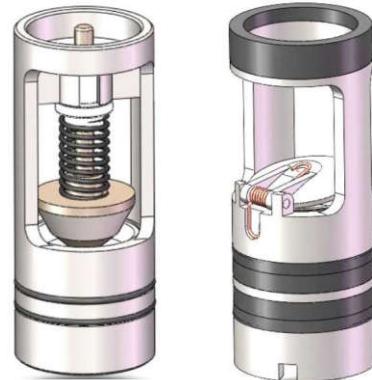

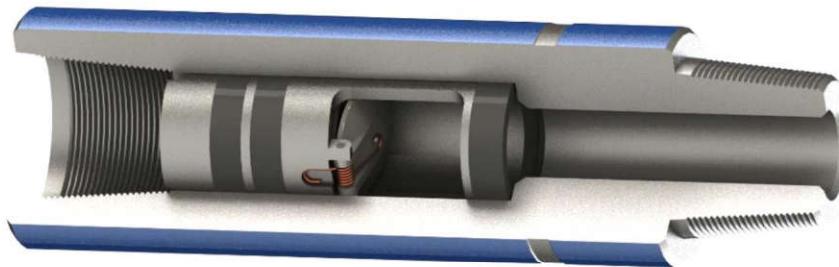

Standard assembly components ensure easy and quick maintenance

旁通阀

Bypass Valve

旁通阀是一种简单实用的应急工具，在钻井中发生溢流、钻头水眼堵塞或需要进行堵漏作业时，可打开该阀进行旁通循环。

Arrow Back-pressure Valve is a sort of pipe inside blowout preventer. It adopts arrow valve structure. It's directly connected to drill stem, and can prevent high-pressure oil stream from blowing out from drilling tool.

特点 Features & advantages

1、内置剪销, 使用更安全

The shear pin is placed inside, which makes it safer to work

2、孔口喷焊合金, 投球座封可靠

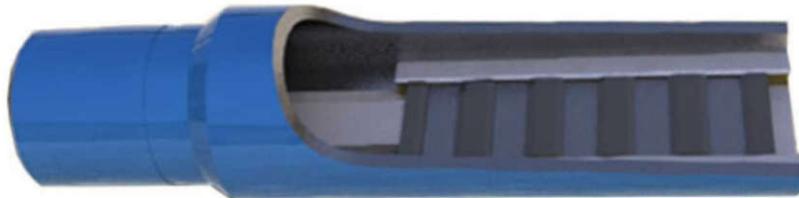

The head of bore is sprayed with alloy, which makes it more reliable to seal & shear

板式强磁打捞器

Plate Magnetic Fisher

板式强磁打捞器用于打捞井下任何形状的小型铁磁性落物

Plate Magnetic Fisher can be used to catch downhole small magnetic absorption falling objects of any shape.

特点 Features & advantages

1、设计有循环通道

Circulation tunnel available

2、磁铁在半圆筒内呈多层排列，增强磁场强度，增大接触面积

Deployment of multi-level magnetic pattern to boost magnetic field intensity and amplify contact area.

3、磁铁置于打捞筒外壳的保护之中，不易破碎

External sleeve protection to avoid magnetic damage

4、底部堆焊铣齿，可进行辅助研磨

With milling teeth on bottom to grinding

螺旋扶正器

Integral Spiral Stabilizer

LX型整体螺旋扶正器分为钻柱型和井底型，螺旋扶正翼面硬度高、韧性好、耐磨性强。

Model "LX" Integral Spiral Stabilizer is divided into drill string model and near bit model. It's characterized by high hardness, good toughness and wear resistance, as well as long service life.

可退式卡瓦打捞筒

Releasing and Circulating Overshot

LT-T型可退式卡瓦打捞筒是用于抓捞落鱼光滑外径最有效的工具，能高泵压循环，也能在井内释放落鱼。

Model "LT-T" Releasing and Circulating Overshot is an external fishing tool used for catch the fish with smooth external surface. Its circulation can be carried out under high pump pressure and the fish can be released on the inside of well

可退式卡瓦打捞矛

Grapple Releasing Spear

LM-T型可退式卡瓦打捞矛是从落鱼内孔进行打捞的工具，其结构简单、性能稳定、强度高。

Model "LM-T" Grapple Releasing Spear is an internal catch fishing tool.
